PRICE LIST—1948-1949

**EBERHARDT
BLUEBERRY
NURSERIES**

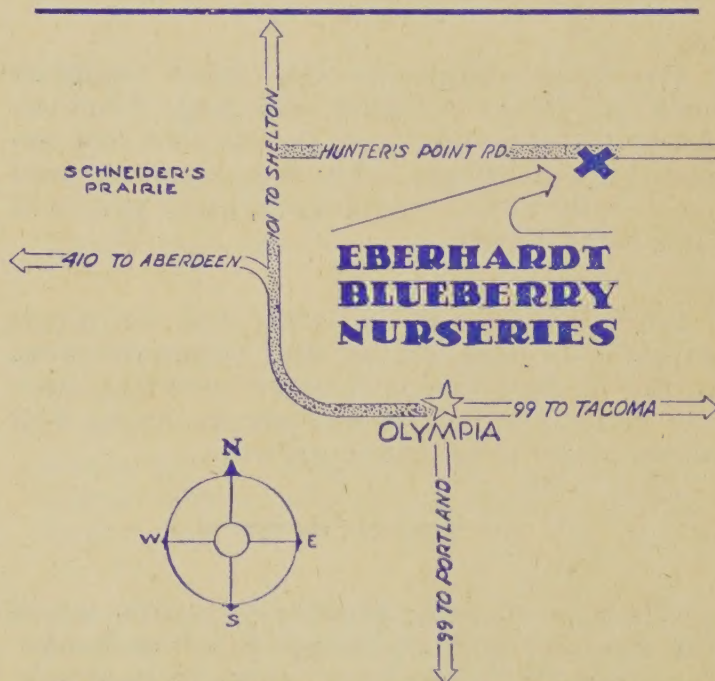

(Since 1924)

"Oldest and Largest in the West"

Phone 9455

Route 1

OLYMPIA, WASHINGTON

Take highway 101 (West) out of Olympia. Five miles out road forks. Keep to right on 101 for about 2 miles. Turn right at "Schneiders Prairie" on "Hunter's Point Road." Stay on blacktop for about 2 miles. Red-roofed house on right hand side of road.

We are growers of blueberries as well as blueberry plants, and offer only such plant stock as consistently in the past has borne good crops for us.

Due to the increasing demand for Blueberry plants, all orders are subject to prior sale.

This price list cancels all previous quotations. Prices are subject to change without notice.

To Our Customers

In honor of our "25th Anniversary of Successful Blueberry Culture," we have revised our price list completely.

WE HAVE REDUCED OUR PRICES DRASTICALLY TO MEET THE OCCASION

All who are interested in growing this delicious fruit should take advantage of Eberhardt's high quality Blueberry stock at these new **LOW PRICES**.

We have eliminated the older varieties such as Grover, Rubel, Harding, Pioneer, Adams, Katharine, and Cabot, and are replanting our fields with the standard, and up-to-date newer varieties which you will find listed herein.

Since the newer varieties are so much superior in size, flavor and productiveness to the above-mentioned older varieties, they are being planted extensively by us as well as the more progressive growers.

When purchasing blueberry plants, select for size and quality, as age is often deceiving when stock has been grown in poor soil.

"Eberhardt" Blueberry stock is a careful selection of the newest, choicest, and best up-to-date varieties grown.

Since our location is somewhat isolated and we produce our own plants and cutting wood, we have so far escaped the numerous diseases which are now making serious inroads on blueberry plantations in some sections of the United States.

Description of Leading NAMED VARIETIES

Please Note—All nursery stock is pruned before leaving nursery and no pruning is necessary until after plants have borne a crop.

STANDARD VARIETIES EXTENSIVELY GROWN

RANCOCAS — One of the best commercial varieties. Bush sturdy, medium in height. Berries medium large, of good flavor. Excellent shipping and freezing qualities as well as for table use. Very dependable cropper. Ripens early July.

1 year nursery grown, each.....	.40
2-year nursery grown, each.....	.60
3-year field grown, each.....	.80

Large—4-year field grown, fruiting size, each 1.75

Large—5-year field grown, each..... 2.25
(In lots of 100), \$2.00 each.

CONCORD—Bush, tall and erect grower. Berries large and of good flavor. A good early mid-season variety. Ripens early July.

1-year nursery grown, each.....	.45
2-year, nursery grown.....	.65
3-year field grown, each.....	.85

STANLEY—Bush tall, and has very ornamental foliage. Berries firm, large and of excellent flavor, ripening from middle of July into August. Good for both shipping and home use.

1-year nursery grown, each.....	.45
2-year nursery grown, each.....	.65
3-year field grown, each.....	.85

JERSEY—The best late standard variety. Bush tall and vigorous grower. Berries are large, of good flavor and stand up well in long distance shipping. Ripening season August and September.

1-year nursery grown, each.....	.40
2-year nursery grown, each.....	.60
3-year field grown, each.....	.80
Large 4-year field grown, fruiting size, each.....	1.75

Large 5-year field grown, each..... 2.25
(In lots of 100), \$2.00 each.

CUTTING WOOD

RANCOCAS and JERSEY Whips about 16 inches long, makes four cuttings per whip. (Not less than 10 whips per bundle of either variety).
Per bundle\$1.00

Promising New

It is our aim in introducing the following three new "Eberhardt" Hybrids to please the Blueberry growers as well as the consumers. These Hybrids have been tested for a number of years on ours as well as other plantations and hence have proven their superiority over older varieties.

PACIFIC—"EBERHARDT HYBRID"—One of our most ornamental and vigorous bushes. Yields berries of unusually large size and good flavor, which are of excellent quality for table use as well as freezing and canning. Clusters ripen evenly and berries run remarkably large in size throughout the harvest. Of all the varieties the berries of the Pacific are the most easily picked. Ripening season, early July.

1-year nursery grown, each.....	.70
2-year nursery grown, each.....	1.00
3-year field grown, each.....	1.50

WASHINGTON—"EBERHARDT HYBRID"—We firmly believe that this is the best shipping berry yet produced. It is also outstanding for both canning and freezing. This berry is large in size and when fully ripened is deliciously sweet. The Washington has inherited the best qualities of both its parents in a superlative degree and no variety yet known to us excels it as a berry suited to all needs. Ripening season late July and August.

1-year nursery grown, each.....	.70
2-year nursery grown, each.....	1.00
3-year field grown, each.....	1.50

OLYMPIA—"EBERHARDT HYBRID"

Bush tall and broad. Berries somewhat larger than Atlantic or Pemberton, of good flavor and excellent shipping quality. Ripens early July.

1-year nursery grown, each.....	.70
2-year nursery grown, each.....	1.00

"N-51-G"—NEW HYBRID—A sturdy upright growing bush producing mammoth sized berries of good quality. Ripens mid-July. It is a very popular variety with us.

1-year nursery grown, each.....	.70
2-year nursery grown, each.....	1.00
3-year nursery grown, each.....	1.50
Large 4-year field grown, each.....	2.25
Large 5-year field grown, each.....	3.00

ew Varieties

ATLANTIC—"COVILLE HYBRID" — Bush stocky and somewhat spreading. Berries very large, and of good dessert qualities, ripening late July.

1-year nursery grown, each.....	.70
2-year nursery grown, each.....	1.00

DIXI—Bush tall. Bears very large berries of good flavor and quality, ripening mid-August.

1-year nursery grown, each.....	1.00
2-year nursery grown, each.....	2.00

WEYMOUTH—Earliest of all varieties. Bush is medium in height, and bears large dark blue berries of good quality. Ripening season, about the middle of June.

1-year nursery grown, each.....	1.00
2-year nursery grown, each.....	2.00
3-year nursery grown, each.....	3.00

PEMBERTON—"COVILLE" HYBRID—Vigorous and very productive bush. Berries surpass Rubel in both size and flavor and ripen earlier. The Pemberton is a very promising new variety.

1-year nursery grown, each.....	.55
2-year nursery grown, each.....	.80
3-year nursery grown, each.....	1.25
Large 4-year field grown, each.....	2.00
Large 5-year field grown, each.....	2.50

BURLINGTON—Latest of all cultivated varieties. Bush is very vigorous and also one of the tallest, reaching a height of about eight feet at maturity. Medium large berry, firm, and of good flavor. Ripening season, mid-August till late September.

1-year nursery grown, each.....	.55
2-year field grown, each.....	.80
3-year heavy field grown, each.....	1.25
Large 4-year heavy field grown, ea...	2.00
Large 5-year heavy field grown, ea...	2.50
